PRECISION BUSINESS SOLUTIONS PROVIDES FREE COMPUTER TRAINING

Ebensburg – Precision Business Solutions, an IT Management and Support Company, announces that it will provide free computer training to businesses and individuals.

Precision Business Solutions will be providing free computer training on the most popular business applications, such as Microsoft Office Word, Excel, PowerPoint, Outlook, and many more. This training will be available, free of charge, on the company's website, www.PrecisionBS.com.

"This has been a pet project of mine that I've wanted to do for quite some time," said Brian Shrift, President of Precision Business Solutions. "Technology is changing every other day, and it's hard for most people to keep up. By providing free training resources, we're hoping that businesses will better understand how technology can help make their business more efficient. And for those looking for a job in this economy, computer skills are a must!"

The training has been posted on the PrecisionBS website in the form of PDF documents, which are easily downloaded and printed. These courses are broken up into different levels based on complexity, guiding the trainee thru a series of exercises to expand upon or refresh their skills on the particular program they are working with. Over the upcoming year, PrecisionBS also will add video training, so the trainee will be able to watch the lessons on their computer, while following along in the training manual. The video training will also be at no charge.
